Description

Going Green Recycled Plastic Large Premier Feeder

Made from recycled plastic, this bird feeder is environmentally friendly and designed for easy maintenance. Because recycled plastic does not absorb moisture, the feeder will not harbor mold or bacteria. The Plexiglas sides provide easy monitoring of seed levels and a hinged roof allows for easy filling and cleaning. This large capacity feeder holds 5.5 pounds of bird seed and comes with a hanging cable. The powder coated perforated metal screen at the bottom of the feeder allows for drainage to keep seed dry. Made in the USA.

Dimensions: 13.5"W x 11.5"D x 10.5"H.

Weight: 6.5 lbs.

Need a Pole to mount your new feeder?
